

NANOSPUN IS REVOLUTIONIZING CELL-BASED PRODUCTS AND SOLUTIONS

With our breakthrough proprietary technology and disruptive capabilities in advanced materials and bioprinting, NanoSpun harnesses the power of biology to create superior live-active cell-based products and solutions. We solve many of the industry's long-standing production challenges to deliver on the promise of a new generation of products made from live-active cells and organisms.

NANOSPUN PLATFORM TECHNOLOGY PROPELS BIOPRINTING, ADVANCED MATERIALS, AND PRODUCTION TO THE NEXT LEVEL

NanoSpun has established a new golden standard within industries. Our technology and products include key fundamental advantages that attain superior performance over today's conventional immobilization, encapsulation, and bioprinting technologies.

NanoSpun technology delivers unsurpassed end-product properties, engineering and design. Our unique technology was advanced and scaled over more than a decade of intensive research and development by the NanoSpun team.

A COMPETITIVE ADVANTAGE FOR NANOSPUN PARTNERS AND CUSTOMERS

NanoSpun has an unprecedented competitive advantage.

Our intellectual property includes 8 families of patents already granted worldwide providing significant commercial advantages for NanoSpun and our partners.

Our proprietary production machinery is designed and developed exclusively by NanoSpun for our unique production processes, increasing the barriers to entry and positioning NanoSpun far ahead of any competitors.

Our partners and customers are renowned global companies in the skincare, personal care, bioprocessing and advanced materials spaces.

SKINCARE

NANOSPUN'S GAME-CHANGING PROBIOTIC PRODUCTS

We offer the first ever live-active probiotic tissues that deliver fresh, natural, and preservative-free compounds directly to the skin. Our sustainable tissues are transparent, silky, and smooth, setting a new industry standard and delivering a completely novel skincare experience.

NanoSpun UltraBio is our flagship, industry-disrupting probiotic sheet face mask. Made from live-active probiotics encapsulated within nano-sized natural fibers and enhanced with plant-based nutrients and superfoods.

NanoSpun Ultra provides all of the groundbreaking attributes of our UltraBio product, without live-active probiotics, delivering the same exceptional and differentiating sheet face mask experience.

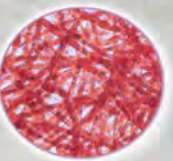

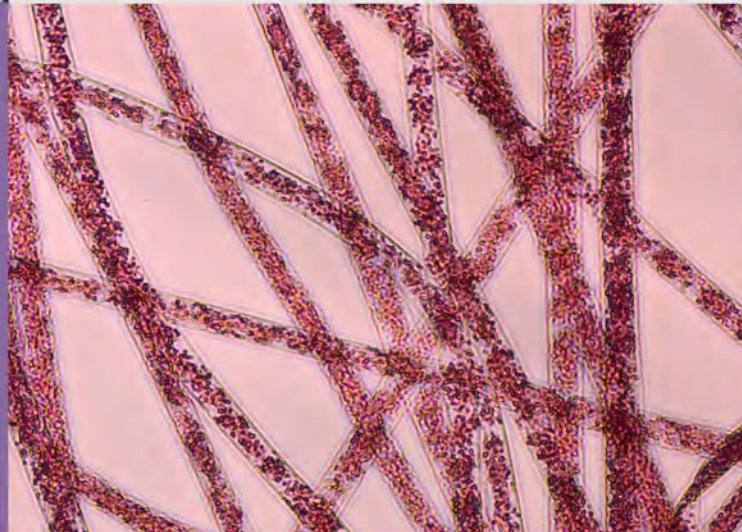

Both UltraBio and Ultra are fully customisable to proprietary formulations that deliver on a unique brand narrative and promise.

LEADING THE WAY TO A NEW GENERATION OF SKIN HEALTH AND BEAUTY

The skin's active biological ecosystem is known as the skin microbiome. It is vital in guarding and supporting skin health, including boosting skin hydration and elasticity, preventing skin sensitivity and redness, reducing wrinkles, and preventing anti-aging effects.

However, our microbiome is under attack daily. Many products we use or conditions we are exposed to pose a threat to our skin microbiome and skin health.

NanoSpun's live and active probiotic products improve the skin's health and beauty by boosting the skin's natural microbiome. Our products are natural, fresh, and preservative free, applied alone or in combination with other regimens.

LIVE AND ACTIVE PROBIOTIC TISSUE

SPEARHEADING BIOTECH BEAUTY INNOVATION

We live in an unparalleled time of biotech innovation, an era of extensive and rapidly growing use of cells and organisms.

NanoSpun harnesses the power of biology to create superior live-active cell-based products. Our technology offers a breakthrough capability in advanced materials and bioprinting that has solved many of the industry's long-standing production challenges.

We deliver on the promise of a new generation of superior biological-based skincare products made from bacteria, yeast, algae, plant cells, and even mammalian cells, that can be customized for use across many skincare applications.
